THE AMN — Sanity Studio Guide (English)

Complete reference for editors and admins managing Insights content at **https://theamn.sanity.studio**.

Quick links

Resource	URL
CMS (Studio)	https://theamn.sanity.studio
Live Insights hub	https://theamn.network/insights
Invite members	https://sanity.io/manage → THE AMN → Members
Webhook / API	https://sanity.io/manage → THE AMN → API

Publishing workflow

```
Edit in Studio → Check SEO preview & publish checklist → Publish → Site rebuilds automatically (~2–5 min)
```

1. Open an **Insight** document
2. Complete **Content**, **SEO**, and **Settings**
3. Turn **Hide from website off**
4. Click **Publish**
5. Wait for Render to rebuild (auto via webhook) — no manual deploy needed
6. Verify at https://theamn.network/insights

Sidebar (desk structure)

Section	What it shows
Live on website	Published insights (`Hide from website` = off)
Hidden / drafts	Insights not visible on theamn.network
Featured	Insights marked for the hub hero slot
All insights	Every insight document

Document tabs

Content

Field	Required	Description
Title	Yes	Article headline
Title emphasis	No	Phrase shown in editorial italic style on the website
Slug	Yes	URL segment → `/insights/{slug}`
Deck / excerpt	Yes	Short intro below the title; fallback for meta description
Category	Yes	Insights · Q&A · Guides
Layout	Yes	Standard article · Q&A (questions in body)
Cover image	Yes	Hero image; **alt text required**
Body	Yes	Main article (see blocks below)
FAQs	Yes (3–5)	Accordion + Google FAQ schema
Closing title	No	Default: “The bottom line”
Closing copy	Yes	Final paragraph + CTA context

SEO

Field	Required	Description
Search preview	—	Live Google-style preview (read-only)

Field	Required	Description
Focus keyphrase	No	Primary phrase to rank for (Yoast-style)
SEO title	No	Browser / Google title (50–60 chars ideal); falls back to Title
Meta description	No	Search snippet (120–160 chars ideal); falls back to Deck
Canonical URL	No	Override canonical; default: `https://theamn.network/insights/{slug}`
Open Graph title	No	Social share title; falls back to SEO title
Open Graph description	No	Social share text; falls back to meta description
Open Graph image	No	1200×630 recommended; falls back to cover image
Twitter card type	No	Summary large image (default) · Summary
Twitter title / description / image	No	Falls back to matching OG fields
Noindex	No	Discourage Google from indexing this page
Nofollow	No	Discourage Google from following links on this page

SEO preview checks:

- Title length (target ~30–60 characters)
- Description length (target ~120–160 characters)
- Focus keyphrase appears in SEO title

Settings

Field	Required	Description
Before you publish	—	Checklist (read-only)
Author	No	Default: The AMN Limited; used in Article schema
Publish date	Yes	Display date on the website
Updated date	No	Set when the article is materially refreshed

Field	Required	Description
Featured on Insights hub	No	Large hero card on `/insights`
Hide from website	No	**On** = hidden from theamn.network even after Publish

Publish checklist verifies:

- Title, slug, and deck filled
- SEO title / meta description (or fallbacks)
- 3–5 FAQs
- Hide from website is off

Body blocks (editor)

Insert via the **+** menu in the Body field.

Block	Purpose	SEO notes
Normal / H2 / H3 / Quote	Standard text and headings	Use H2 for sections; one H1 comes from Title
Bullet / numbered lists	Lists	—
Strong / Emphasis	Bold and italic	—
External link	Any URL (http, relative, mailto)	Use for GEO Auditor, external sources
Link to Insight	Picker → another Insight article	Internal linking; builds `/insights/{slug}` automatically
Image	Inline image	**Alt text required** (5–160 chars); optional caption
Callout / CTA	Info box or button CTA	Info style · CTA with button label + URL
Pull quote	Large editorial quote	Optional attribution
Table	Rows and columns	Good for comparisons

Roles & access

Studio requires login (Google or invited email). Manage members at **sanity.io/manage → Members**.

Role	Typical user	Can do
Administrator	You / tech lead	Invite users, API tokens, billing, deploy
Editor	Marketing / content	Create, edit, publish Insights
Viewer	Audit / read-only	View only

Editors do **not** need Render, Git, or terminal access.

What happens on the website

Studio action	Website effect
Publish insight (draft off)	Webhook triggers Render rebuild
Hide from website on	Article removed on next build
Featured on	Article eligible for hub hero
SEO fields	Meta tags, OG, Twitter, canonical, robots
FAQs	Accordion (non-Q&A) + FAQPage JSON-LD
Author / dates	Article JSON-LD
—	Breadcrumb schema: Home → Insights → Article

SEO best practices (per article)

1. Choose one **focus keyphrase** and use it naturally in title, H2s, and deck
2. Write a unique **SEO title** (~50–60 characters)
3. Write a unique **meta description** (~120–160 characters) with a clear benefit
4. Keep **slug** short and readable (`geo-luxury-hotels`, not full sentences)

5. Add **alt text** on cover and every inline image
6. Add **2–3 internal links** to other Insights (`Link to Insight`)
7. Complete **3–5 FAQs** with real guest/owner questions
8. Set **updated date** when you refresh an existing article
9. Use **noindex** only for test or duplicate content — rarely needed

---

Technical notes (admins)

Item	Detail
Document type	`insight` (singular — not `insights`)
Dataset	`production`
Project ID	`rhoqrzq3`
Auto-deploy	Sanity webhook → Render Deploy Hook
Fallback	If Sanity is empty/unconfigured, site uses markdown in `src/content/insights/`

Support

- **Content questions:** Marketing lead
- **Studio access:** Administrator (sanity.io/manage → Members)
- **Site not updating after publish:** Check Render → Events for deploy; confirm Render env vars are set
- **Developer docs:** `docs/SANITY.md`, `docs/AUTO-DEPLOY.md`
